

ERP50-70NL

Integrated lithium-ion forklift

LITHIUM-ION POWER THAT KEEPS YOU MOVING.

- Integrated 80V 420Ah lithium-ion battery delivers consistent power for longer run times between charges
- Reach full charge in as little as two hours to keep trucks in operation
- Support demanding multi-shift operations without battery swaps through fast opportunity charging

LIGHTER DESIGN. STRONGER PERFORMANCE.

- The truck weighs just over 660 pounds less than the equivalent lead-acid powered model
- Reduction in truck weight improves acceleration and reduces energy consumption for long run times in demanding applications

LESS MAINTENANCE. MORE UPTIME.

- Virtually maintenance-free components help reduce service demands
- Lithium-ion battery eliminates topping up and equalization charging
- Designed to support sustainability goals while keeping your operation running

TOP FIVE PRODUCT FEATURES

1. OPEN SPACE DESIGN

- Maximizes comfort and convenience
- Gives increased freedom to position feet during operation

2. LOWERED SEAT AND FLOOR PLATE

- Allows easy ingress and egress from the truck
- Cowl lower by 3 inches to allow better fork tip visibility

3. REPOSITIONED CENTER OF GRAVITY

- Enhances drive quality
- Improves truck handling in corners

4. ENERGY EFFICIENT

- Fast charging times increase operational uptime
- Opportunity charging has no adverse effect on battery life
- Truck retains full suite of low state of charge safety features

5. EASY OPERATION

- External charge socket allows quick and easy connection
- No battery exchange process needed
