

# Take fleet visibility to the next level

## STATE OF THE INDUSTRY

Impacts from inflation and increasing overhead expenditures are driving cost pressures and decreasing margins. To stay ahead, companies must find opportunities to drive efficiencies in their operation thus reducing cost and generating more revenue.

## FLEET MANAGEMENT & OPERATIONAL BENEFITS

Yale Fleet Management can help your operations realise greater materials handling equipment uptime and utilisation savings, enhanced maintenance and parts availability, as well as other impressive savings to reduce total costs.

Adding the Yale Fleet Management program can yield **up to 15% savings** on your overall materials handling costs.

### Fleet reporting

Regular fleet performance overviews that identify operational best practices and highlight areas for improvement & cost savings.

### Maximum uptime

Online dispatch to maximise uptime and productivity along with increased same day service.

### Scalable service programs

Customised service offerings deliver the right, usage-based service levels fit for the application. All service events performed by professional, certified Hyster technical team members.

### Fleet oversight

Take advantage of planned maintenance, as well as repair quote and invoice oversight to increase accuracy and drive low cost of ownership.

## OPTIMISE YOUR FLEET

Streamline your entire fleet by accessing forklift fleet data through an easy-to-use portal or in consultative quarterly business reviews.

Gain insights around:

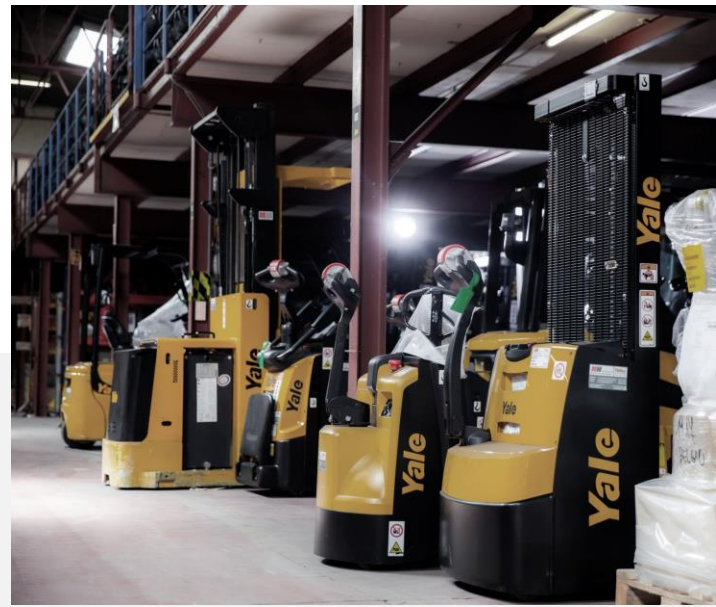

- Equipment utilisation – analyse fleet size, age and costs, so replacements can be considered as needed
- Identify and address locations with high maintenance spends and repairs
- Monitor and provide insights to help reduce truck and product damage
- Recognise trends and potential future failures or issues by tracking repair history
- Track planned maintenance (PM) and avoidable damage spend to match individual lift truck usage levels

# Yale Fleet Optics™

Fleet Optics is a consultative service that provides a dedicated industry-specific fleet advisor who continually monitors and evaluates their lift truck data, draws insights and develops recommendations to manage costs, averts negative trends and helps increase uptime and productivity.

## ADD FLEET OPTICS FOR A CONSULTATIVE APPROACH

1. Monitor truck data and provide application analysis.
2. Analyse unit and Fleet performance using telemetry data.
3. Make recommendations to increase uptime.
4. Provide quarterly business reviews as a fleet health check for your equipment and operations.

## LEARN MORE

At Yale, we challenge everything, you should too. Our innovative solutions are created around years of experience and cutting-edge technologies. We strive to deeply understand your challenges and tailor solutions for your unique operation.
