

Voice controlled end rider with Honeywell technology

AVAILABLE ON YALE[®] MPE060-080VH END RIDER PALLET TRUCK MODELS

What might my company gain from adding the voice controlled end rider with Honeywell technology?

- Improved order picking rates
- Increased profits due to higher throughput
- Improved order accuracy
- Reduction in facility or product damage
- Higher retention of labor

How is the Honeywell technology different from other manufacturers?

Yale has paired with Honeywell to offer the very first voice-controlled technology to help with order picking. Other manufacturers require manual operation of a glove or other wearable devices. For the voice controlled end rider with Honeywell technology, your operator only needs a headset¹ and basic voice commands to control the horizontal movements of the truck.

- Vehicle begins in manual mode
- Operator drives to rack
- Operator speaks a predetermined voice command
- Truck switches to auto mode and advances the pre-programmed distance
- Operator speaks a predetermined voice command to stop the truck
- Operator speaks a predetermined voice command to sound the horn at any time

Is the voice controlled end rider difficult to implement or complicated to learn?

No. The solution is easy to implement into your existing fleet, and actually shortens your order picking staff training time. The voice commands extend the truck's functionality with intuitive human thought and movement.

What models is the technology available on?

- MPE060VH
- MPE080VH

Are there any truck requirements for the voice controlled end rider with Honeywell technology?

Yes. There are a few options that are required.

- Power Assist Steer
- Auto Coast Control
- Platform Lights
- DC / DC Converter
- Voice System¹

Are there any truck incompatibilities with the voice controlled end rider with Honeywell technology?

Yes. There are a few options that are incompatible.

- Extreme Corrosion Wash Down Package
- Manual Steer / Manual Steer with Auto Coast Control
- EE Rating
- Toe Guard / Blue Light / Visible Alarms (Available as standalone SPED option)
- Freezer/Cooler/Sub Zero packages²
