

Reliable. Reinvented. Recharged.

Yale® Series N electric
lift trucks for flexibility
indoors and outdoors

FLEXIBILITY FOR OPERATIONAL NEEDS

Various options for battery, controls, and more to suit individual operators and warehouse operations

PRODUCTIVITY AND PERFORMANCE

Battery and motor options for reduced total cost of ownership

VISIBILITY AND MANEUVERABILITY

Best in class* through-mast visibility and zero-turn radius for improved accuracy

DESIGNED FOR COMFORT AND EFFICIENCY

A tailored operator experience to help to enhance confidence and productivity

Suitable for a broad range of tasks, indoors and outdoors in various industries.

- Home Centers
- Auto Parts Distribution
- 3PL
- Furniture and Furnishings
- Food Distribution
- Beverage

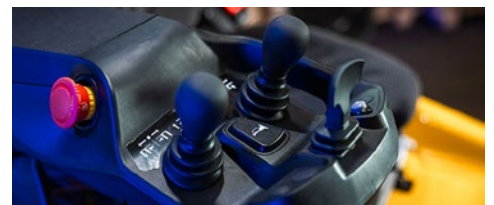

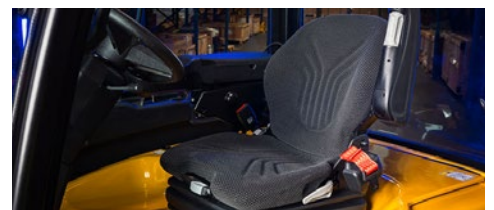

The Yale® ERP45-70N Series N electric lift truck is built on a foundation of proven performance

A selection of options empowers warehouses to specify the truck they need to tackle their unique requirements, supporting enhanced productivity and ergonomics, with safety features as standard.

The motor is protected from dust and water damage, with IP67 rating. An optional enhanced motor features permanent magnet drive motors and hydraulic pump. This delivers higher performance and lower energy consumption for a reduced TCO.

The Dynamic Stability System (DSS) enhances stability and helps reduce the likelihood of tip overs by restricting lift truck performance when the forklift is operated outside set parameters.

Battery flexibility to suit you

- Lead Acid
- Lithium-ion
- TPPL (Thin Plate Pure Lead)
