

Don't let attachment failures bring your operation to a screeching halt.

Materials handling equipment and its attachments are the driving force behind your operation. If anything malfunctions, you know the drill – everything comes to a screeching halt, which may result in lost profits. You don't have time for this.

Maximize uptime and efficiency with attachment ready trucks

Yale Materials Handling Corporation teamed up with Bolzoni Group, a global leader in attachment solutions, to design a seamless and consistent marriage between truck and attachment interface.

The result . . . Yale® paper clamp attachment ready trucks with a modified front end, which allow Bolzoni Auramo paper clamps to fit perfectly for top notch performance – helping you achieve greater uptime and efficiency.

Why an attachment ready truck?

- Help provide proper truck-to-attachment interface
- Minimize inconsistencies experienced with field installations
- Make sure proper hydraulic hose sizing, hose routing and hydraulic fittings are consistently used
- Reduce hydraulic and engine overheating potential, engine component stress, and improves attachment performance and truck fuel efficiency

Get paper clamps you can depend on.

Why settle on just any paper clamp when you can get one engineered by a leading attachment manufacturer like Bolzoni Group? Bolzoni Auramo paper clamps are specifically designed to transport paper rolls without costly product damage, improving the quality and speed of your paper handling operation.

Why a Bolzoni Auramo paper clamp?

Realize reliability and precision

- Built-in pressure relief valves allow for adjustable clamping pressure
- Hydraulic cushioning in vertical end positions reduce paper roll damage
- Optional ForceMatic valve provides mechanically-actuated and fully automatic hydraulic force control
- Offers fast and accurate 180° rotation
- Slim and smooth arm and frame design provides optimal visibility

Achieve specific configurations

- Customized arm dimensions available to meet exact needs
- Non-split long arm offered for single roll handling, and split arm for one and two roll handling
- Includes special openings to meet specific application requirements
- Non-standard and special mountings available on request

Properly and efficiently transport:

- Paper rolls
