

Take charge of your batteries.

Increase your productivity and cut your downtime with Yale® Battery Vision

Yale Battery Vision is a fleet management solution that provides valuable insights to better care for your batteries and maximizes their performance and life. Utilizing existing wireless networks, Yale Battery Vision monitors usage, alerts users of potential battery issues, and transforms your facility's vehicles into an intelligent fleet operation. With Yale Battery Vision, you can now take charge of your batteries.

Water Level

Encourages proper watering of your batteries by reporting electrolytes at high and low levels

24/7 Monitoring

Utilizing existing wireless networks to transmit data to the cloud-based Yale Vision portal

Smart Charging

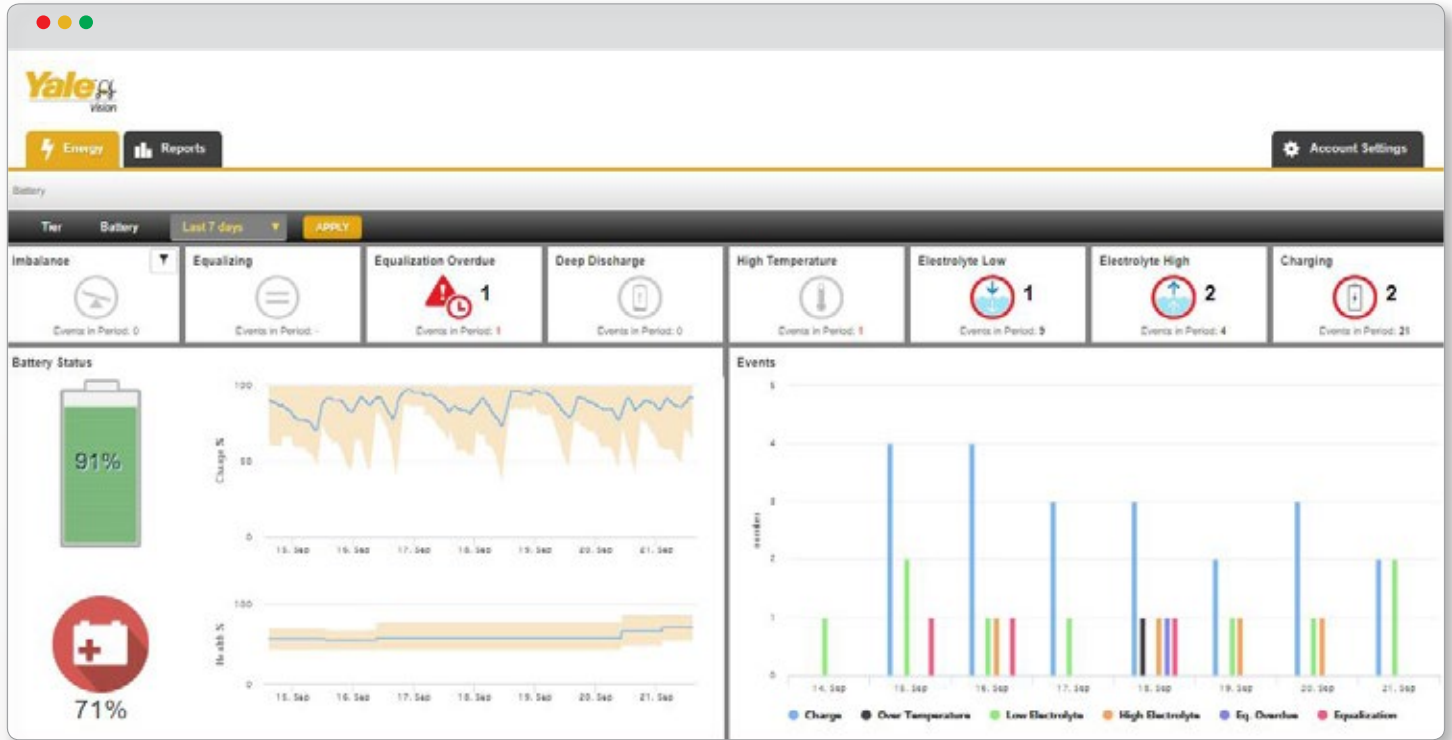

Delivers analytical data such as state of charge, voltage current, and battery temperature to improve battery care and charging behavior

Warranty Compliance

Stores data for the life of the battery and provides complete history to comply with your battery warranty

Contact your local authorized Yale® dealer for more information
